Dear Readers,

*"Time is all you have.*

*And you may find one day that you have less than you think."*

Time management is the key to success. It allows taking control of life rather than getting remote controlled by time. When one practices good time management skills, there is no room for procrastination. So, the better one gets at it, the more self-discipline one can learn. This is a valuable skill, if not practiced, starts impacting other sphere of life. So, this skill is a must have in today's world where time is limited and tasks are many. It is relevant even more for students who seek to pursue a time bound goal and face many milestones through their school life.

A tide never waits for the sailor. Instead a sailor has to take advantage of the tide. Similarly, time runs very fast. Just know when is the right time and act decisively i.e., act with full vigour when time comes and stop postponing things. Just learn to complete the work within the given time frame by knowing how to manage time. Time is demanding and never stands still even for a second.

Time management works best when a goal or target is set. For instance, a student becomes far more effective at learning when they decide to assign two hours for learning a particular concept. This is effectively a method of benchmarking progress. Thus, everyone must practise time management to improve productivity and efficiency of tasks.

On this note I sign off with the words of Victor Hugo, "He who every morning plans the transactions of that day and follows that plan carries a thread that will guide him through the labyrinth of the most busy life."

Best Wishes!

**Venice Vivek Benjamin**  
(Vice-Principal, HGIS)

In life, what matters is our attitude. If we give up easily, we cannot taste the flavours of success. It takes years for a tree to give a tasty fruit. Similarly it will take time to make success, sometimes even years. The path of success can be rough and hard but if we keep going without any lack of confidence the day to success is not really far away.

If we want to win in life we should not stop till we get what we are looking for. The only thing that helps us to make an achievement is self-confidence. If we believe we can make wonders, we will. So we should believe in ourselves before expecting others to believe us or support us.

Our attitude is what influences all our actions. It is only the right attitude, which gets us good results. It has been said that Opportunity 'knocks' at every door. If we utilise it, it leads to success. Otherwise, we just complain about the 'noise'. Every problem that we face is nothing but an opportunity, to succeed, by learning how to conquer it. The better we get at problem solving, the more successful we are.

When life gives us a thousand reasons to quit, trying gives you one reason to try one more time. Never give up, till you become a great achiever.

*"Failures are the stepping stones to success."*

## Welcome back to School

We are extremely proud of how resilient and positive our children have been throughout the unprecedented period of lockdown. From coping with school closure and the absence of dear friends to migrating into the world of online school, the children have, without exception, embraced every stage with an impressive attitude.

It was wonderful to welcome children back to school. All of us were excited to be back, including teachers. The playground is once again alive with the sounds of children laughing and chattering. The classes are brimming with synergy and animated discussions. The school re-opened in a phased manner on 4 April 2022 with new hopes and aspirations. Putting the past behind us, we are now loving every moment in the sun, together with our friends and mates.
